SUMMARY

Senior Software Engineer with 3+ years shipping production systems, now focused on applied AI: agentic LLM workflows, multi-agent orchestration, RAG and tool calling on Claude, OpenAI and Gemini APIs. Raised team productivity 50-60% with an LLM delivery pipeline; owned a 100+ user ERP with zero downtime for 2.5 years.

TECHNICAL SKILLS

Generative AI and LLMs: Large Language Models (LLMs), Agentic AI, AI Agents, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Prompt Engineering, Tool/Function Calling, Model Context Protocol (MCP), Fine-Tuning (LoRA), Multimodal AI
LLM APIs, Frameworks and LLMops: Anthropic Claude API, OpenAI API, Google Gemini API, LangChain, LangGraph, CrewAI, Claude Code, Claude Skills, LLM Evals, Langfuse, LangSmith, Guardrails, Prompt-Injection Defense, Ollama, vLLM, n8n
Backend, Data and Frontend: Python, SQL, FastAPI, SQLAlchemy, Pydantic, REST APIs, WebSockets, Microservices, PostgreSQL, Vector Databases (pgvector, Pinecone, Qdrant), MySQL, Redis, Supabase, React, TypeScript, JavaScript, Next.js, React Native
Cloud, DevOps and Testing: AWS (EC2, S3, IAM), Docker, Nginx, Linux, Cloudflare, Vercel, GitHub Actions (CI/CD), pytest, Git

EXPERIENCE

Metron Security

Pune, India

Senior Software Engineer

May 2026 - Present

Software Engineer

Jun 2025 - May 2026

- Built a multi-stage, LLM-powered software delivery pipeline on the Anthropic Claude API that automates research, documentation, spec writing, validation and deployment, raising team productivity by 50-60%.
- Designed an agentic AI system that routes natural-language commands to the right automation via tool/function calling and context-injected instructions, running multi-step workflows end to end for non-technical users.
- Codified reusable AI workflows with Claude Code, custom Claude Skills and Model Context Protocol (MCP) integrations.
- Built Python integration services for a CrowdStrike-based security plugin platform across REST APIs with OAuth2, API key, HMAC and AWS SigV4 auth, shipped on AWS with exponential-backoff retries, structured logging and GitHub Actions CI/CD.

Integrated Active Monitoring

Pune, India

Full Stack Engineer

Nov 2022 - Jun 2025

- Owned every layer (schema, FastAPI backend, React/TypeScript frontend, deployment) of a 30+ module production ERP used daily by 100+ field engineers, with zero downtime over 2.5 years.
- Designed 40+ FastAPI endpoints on a three-layer architecture at p95 under 200 ms; used EXPLAIN ANALYZE to fix missing indexes and N+1 ORM queries, cutting report queries from 8 s to under 3 s.
- Added Redis caching that cut database load ~40% and dashboard response times from ~800 ms to under 200 ms.
- Implemented JWT authentication and role-based access control (RBAC) across 3 roles with zero access-control incidents, drove pytest coverage above 90% on core logic, and refactored ~3,000 lines of procedural code into a service layer.

PROJECTS

ProctoHire - Proctored Assessment and Hiring Platform (proctohire.com)

React, FastAPI, Supabase, Gemini API

- Built a multi-tenant SaaS for proctored tests and video interviews, live with a paying customer; 700+ test invites in 90 days.
- Integrity engine scores each attempt 0-100 from tab-switch, focus and copy-paste signals, backed by webcam and screen clips and keystroke replay; server-side pasted-code detection had 0 false positives across 24 sessions.
- Gemini-powered grading of open-ended answers, AI test generation, resume parsing and JD matching; sandboxed code questions run against test cases in 22 languages with real-time Socket.IO proctoring behind Nginx on Hetzner.

JobPipe - LLM-Powered Job Matching and Document Generation Engine

Python, Claude API, SQLite, LaTeX

- Grounded LLM layer writes tailored PDFs from a verified fact bank; a guardrail blocks hallucinated technologies and metrics.
- Ingests postings from 8 ATS APIs (Greenhouse, Lever, Workday and more) with SQLite deduplication and relevance scoring.

Freelance Software Development - Clients in India and the UK

Jul 2026 - Present

- Built an iOS cricket coaching app for a UK academy (React Native, Expo, Supabase) with Gemini-drafted session logs.
- Next.js websites on Vercel: jameelstuartcricketacademy.com, nourishagro.com (90-product storefront) and cravorii.com.

ACHIEVEMENTS

- Grew a YouTube channel to ~100K subscribers and ~40M total views; approved for Google AdSense monetization.
- Solved 500+ Data Structures and Algorithms (DSA) problems on LeetCode, HackerRank and GeeksforGeeks.
- Raised 5+ pull requests to open-source projects.

EDUCATION

Vishwakarma Institute of Technology - Bachelor of Technology (B.Tech), Mechanical Engineering (CGPA: 8.57/10) 2020 - 2024
